

For 75 consecutive planting seasons
Burrus provides 100% free replant

Burrus has provided 100% free replant for seed corn for 75 consecutive seasons. This “insurance” guarantees a growing start when customers plant a hybrid from the Burrus family of products.

If for any reason the stand of corn or soybeans is generally impaired and it is desirable to destroy the stand and replant in a field originally planted to the Burrus family of products, Burrus Bros. and Associated Growers will furnish the seed portion in adequate quantities to replant the field or fields free of charge, provided the field is replanted to corn during the same season (applicable supplier, value-added fees may apply). An added bonus is that if your original planting had Poncho Xtra (250) or Burrus Xtra Poncho (500) on your seed, the replant seed will too, at no additional charge (provided we have such seed available).

For all growers who did not qualify for the Extra Value Opportunity, Monsanto corn products including VT3® and Roundup®, will have free seed corn, free seed treatment (of equal value or less based on availability), but applicable value added fees will be the responsibility of the grower to pay. If a grower qualifies for the 2010 Roundup Rewards, he will receive a refund check directly from Monsanto.

Hoblit Roundup soybeans will have a \$35 per 130k unit charge. The seed treatment will be furnished (of equal value or less based on availability). If a grower qualifies for the 2010 Roundup Rewards, he will receive a refund check directly from Monsanto.

Conventional corn products, as well as Herculex® and Agrisure® treated products have free replant that includes free seed, free seed treatment, and free royalties. Power Plus® Brand soybeans will have a \$25 per 130k unit charge. These beans do not qualify for Roundup Rewards. The Value Priced products with a no-return policy still qualify for the same replant policies.

To accept the 100% free replant offer, the grower must notify the Burrus/Hoblit dealer from whom he purchased his seed in time to permit inspection of the field BEFORE the original stand is destroyed.

You can plant early with the confidence that the Burrus family of products will guarantee a growing start. Plant the seed that leads to success – grow all Burrus and let us show you another reason why when you think value, Think Burrus.
