

HIGH-PERFORMANCE ALFALFA FORAGE SOLUTIONS

Corn and soybeans aren't all we offer at Burrus Seed. We also have three high-performance alfalfa varieties. Designed for growers in search of high forage yielding options, we have three distinct products to fit your needs.

Use the product descriptions and agronomic summaries at right to learn more about the exceptional varieties available. To find the product best-suited for your operation, contact your Burrus representative.

214FY BRAND ALFALFA

A high forage yielding, persistent alfalfa with excellent quality potential. It expresses quick re-growth after cutting to maximize the growing season.

214FY performs best in high producing, well-drained soils. It has a solid disease, insect, and nematode resistance package that helps defend itself in adverse environments.

214FY is the alfalfa variety of choice for dairy or beef producers who demand high tonnages of dairy quality forage.

388HY HYBRID ALFALFA

This product represents an improvement in hybrid alfalfa utilizing patented msSunstra® technology!

This product has familiar hybrid characteristics like dense stands with fine-stemmed herbage and fast recovery, but 388HY comes with an exceptional boost in yield. The fine stem attribute makes a dense, attractive alfalfa bale.

For the highest yields of consistently high-quality forage, 388HY is the variety of choice.

344EQ ALFALFA

344EQ (Extended Quality) provides superior forage quality with an extended harvest window for growers.

This product features high TTNDFD and NDGD48 forage quality scores. A reduced lignin content further improves the digestibility and quality of 344EQ.

Outstanding yield, coupled with a reliable disease package, creates a well-rounded product. 344EQ belongs on farms intending to produce high yields of consistent quality forage.
