TEST COMMENTS:

This location was planted in somewhat dry conditions but followed shortly with plenty of moisture. Emergence did struggle a bit early on but the varieties compensated and filled out well for the conditions that they were subjected to. Although planted fairly early, pod fill began at a slower pace than normal. A lack of rain in late July and August is more than likely to blame. This plot was planted with Bruce and Nick Constant after a year break, and I can't thank them enough for being outstanding plot hosts.
